

A woman with long brown hair, wearing a light blue button-down shirt, is seated in a private jet cabin. She is focused on her laptop, with her hands on the keyboard. The cabin features cream-colored leather seats and large, curved windows. A white coffee cup sits on a saucer on the table in front of her. The lighting is soft and warm, highlighting the interior of the aircraft.

BOMBARDIER

Ka-band

The fastest in-flight internet connectivity worldwide.
Available for retrofit on in-service Challenger 604, Challenger 605 and Challenger 650 aircraft.

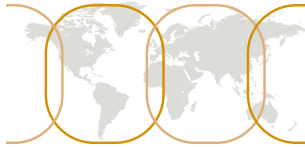

Ka-band

Delivering the fastest in-flight internet connectivity worldwide*, Ka-band keeps you informed and entertained wherever your travels take you. You can video conference, stream movies and share large files. The Ka-band capabilities onboard the Challenger 604, Challenger 605 or Challenger 650 aircraft will exceed your highest expectations.

WORLDWIDE COVERAGE

Leveraging the latest Ka-band satellite technology, Challenger 604, 605 and 650 aircraft can now be equipped with an internet connectivity designed to match the range of the Challenger aircraft family.

FASTEST CONNECTIVITY

Featuring the fastest in-flight internet connectivity worldwide, Ka-band enables video conferencing and movie streaming. With multiple data package options available, clients can select the right speed for their needs. Passengers will be as productive in-flight as in the office and free to enjoy their favourite entertainment seamlessly.

PERFORMANCE COMMITMENTS

Ka-band is unbeatable in terms of speed in-flight, coverage and reliability. To illustrate the confidence in the service, the Ka-band packages are backed by performance commitments offered by the leading service providers.

CONNECT, STREAM, WATCH & COMMUNICATE

With Ka-band, users can enjoy the following activities while in flight or on the ground:

- Video conferencing
- Internet TV
- High-definition video streaming
- Video on demand
- Large file upload and download

When used in conjunction with compatible Cabin Management Systems onboard Bombardier aircraft, the system offers the possibility to relay content throughout the cabin for an immersive entertainment experience.
