

Component Repair and Overhaul

For Learjet, Challenger and Global Aircraft

BOMBARDIER

Component Repair and Overhaul

For Learjet, Challenger and Global Aircraft

With more than 50 years of experience, the Bombardier Component Repair and Overhaul (CR&O) organization has set industry standards for MRO services for Learjet, Challenger and Global aircraft customers.

Benefit from the following OEM advantages:

- CR&O Centre of Excellence in Wichita (KS)
- OEM Factory-trained and experienced technicians
- Extensive list of CR&O capabilities

To keep your aircraft flying and minimize downtime, our team will work with you to explore and implement innovative repair solutions to help:

Improve component repair turnaround time

Improve aircraft reliability

Reduce operating costs

Increase your in-house repair productivity

Using only OEM approved replacements parts, our factory-trained technicians use the latest technical data, techniques and tooling solutions to ensure that your component is repaired or restored to like-new operating condition.

Our CR&O solutions cover:

- Landing gear and actuators
- Steel and carbon brakes
- Avionic instruments
- Flight controls
- Hydraulics and pneumatics
- Electrical and battery servicing
- APU and starter generators
- Relay and audio control panels
- Structures and sheet metal repair
- Level 3 NDI solutions
