

Bombardier's l'Opéra

Sound that soars

BOMBARDIER

Introducing Bombardier's l'Opéra

The industry's most advanced audio system for the most immersive and highest fidelity sound. Bombardier's l'Opéra is the first audio system in business aviation featuring full-range speakers, advanced digital signal processing and seat-centric sound technology for exceptional audio quality.

Full-Range Speakers

Bombardier's l'Opéra features a collection of full-range speakers including mid and high-range drivers with integrated passive technology, a surround sound centre channel speaker and deep bass sub-woofers.

Technical Specifications

1275 watts

Four times as powerful as traditional home amplifiers

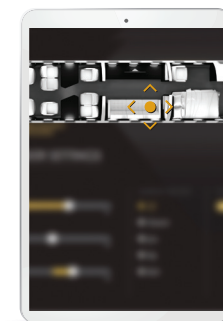

57 Hz - 20,000 Hz

Exceeds the range of the human ear

Up to 97 dB

Similar to a symphony orchestra

Advanced Digital Signal Processing

Bombardier's l'Opéra is equipped with powerful amplifiers that deliver the widest frequency range with exceptional signal integrity for warm, rich and vivid sound at the highest volume settings.

Seat-Centric Sound Technology

Bombardier's l'Opéra brings surround sound to life with seat-centric sound and adjustable sweet spot technology that creates an immersive audio field personalized to your precise location in the cabin.

Break the sound barrier with Bombardier's l'Opéra. Available only on the Global 8000 and Global 7500 business jets.
